

EDP Renováveis signs long-term agreement to sell green certificates in Poland

Madrid, January 25th, 2010

EDP Renováveis, S.A. ("EDPR"), through its subsidiary Relax Wind Park I SP. Z.O.O., has just entered into a 15-year agreement with ENERGA – OBRÓT SA ("Energa") to sell the green certificates generated from its 120 MW Margonin wind farm in Poland. This agreement enables EDPR to secure an important part of its revenue line in Poland and will provide a higher cash flow visibility for the long-term.

This is EDP Renováveis's first wind farm in Poland and the first agreement with Energa, which assumes therefore a long-term commitment to support renewable energy projects in Poland,"

"We are pleased that such renowned international investor has chosen our company as a solid and professional partner to establish a long-term cooperation. We estimate, that so called "green" property rights produced by this wind park shall amount to 250.000 MWh per year. ENERGA, as the biggest supplier of green energy, is going to develop its own ecological energy sources, but the company is open to the business cooperation with external contractors, for which the best example is the agreement with EDP Renováveis – underlines Arkadiusz Marat, President of the Board of Energa. "

Located in Margonin commune, Poland, the project is already producing clean, renewable energy.

About EDP Renovaveis
